English, Spanish – All professional proficiency or above

Neivor LLC   Tech Lead   Jan 2021 – Currently

Role purpose:
Responsible for the analysis, design and development of the front end of the Real Estate App and also hiring, training and management of front end developers.
Responsibilities:
Management and Training of 6 developers in VueJS, Jest, Atom Design and OKRs. Create documentation for code and style guidelines. Development of Onboarding and Dashboard pages using Atom Design, VueJS, Scrum and Jira. Improvement of KPIs of the company.
Achievements:
Expand the company to Mexico in just 2 months due the fast Dashboard development thanks to the new project architecture.
Close an investment round of USD 3.5 million by showing that we could expand rapidly.

Blest   Frontend Developer   Jan 2018 – Dec 2020

Role purpose:
Responsible for the analysis, design and development of a coordination application, ux writing, application design, social media design and user experience.
Responsibilities:
Frontend:
ReactJS for building user interfaces, React Hooks for custom functionality, Redux for state management, React Router for routing, Firebase and JWT for authentication, Unit Testing using Jest and Enzyme to test components, git and Gitflow workflow and styled-components for the styling of components.
Backend:
I used NodeJS and ExpressJS for building the API, MongoDB as a database to store events.
Design:
I used Figma in order to create a design system and social media campaign designs.
I did UX writing to guide users within the application and give them a predictable experience.
Achievements:
Improved company communication that allowed them to safely scale. Before the app, they couldn't scale because of the way they dealt with employee absences or stock shortage.
